EDUCATION

American University of Sharjah, Sharjah

Expected June 2027

Bachelor of Science, Computer Science | GPA: 3.25 / 4.00 | Academic Distinction Scholarship

Relevant Coursework: Data Structures & Algorithms, Numerical Analysis I, Computer Systems, Design and Analysis of Algorithms, Web Application Programming

EXPERIENCE

NAFFCO GROUP — Full Stack Developer Intern

June 2026 - July

Dubai, Jafza South · On-site

2026

- Developed E-Connect, an internal CRM portal from the ground up using Angular 20 and ASP.NET Core
- Built features including account, contact, opportunity, and revenue management with full CRUD operations
- Implemented JWT authentication with role-based access control and audit history tracking
- Built a drag-and-drop activity calendar using FullCalendar v7 and a dynamic landing page with visit tracking and task/meeting management
- Followed clean architecture using the repository pattern, Entity Framework Core Code First, and a fully custom UI design system aligned to the company brand

PROJECTS

Personal Portfolio Website

HTML, CSS, JavaScript

- Developed a responsive portfolio to showcase projects and skills using HTML, CSS, and JavaScript
- Implemented interactive features and smooth navigation; deployed with GitHub Pages

CarCare — Full Stack Web Application

Academic Project

HTML, CSS, JavaScript, Java Servlets, MySQL, Apache Tomcat

- Built a simulated car wash and detailing booking platform to demonstrate full-stack web development skills
- Developed a Java Servlet backend following the DAO design pattern with full CRUD operations on a MySQL relational database
- Implemented a dynamic frontend that fetches live data from the database including service packages and pricing
- Created an admin dashboard with session-based authentication for managing bookings and service prices in real time
- Designed a customer-facing My Bookings page allowing users to look up and cancel reservations by phone number

Unity Game Development

Game Development Club

Unity, C#

- Built 2D and 3D games using Unity and C# with gameplay mechanics and UI systems

SKILLS

Programming Languages: C++, C#, Java, Python, JavaScript, MATLAB, Assembly x86, TypeScript

Web Technologies: HTML, CSS, JavaScript, Bootstrap, Jakarta EE (Java Servlets), Angular, ASP.NET CORE,

Databases: MySQL

Tools: GitHub, VS Code, Visual Studio, Eclipse IDE, Apache Tomcat, Unity, Cisco Packet Tracer, SQL Server Management Studio

Languages: English (Fluent), Arabic (Native)
